FEARN · FARM

**'NORTHERN LIGHTS'
ANNUAL PRODUCTION SALE**

**BEEF SHORTHORN BULLS, HEIFERS & SEMEN
BVD ACCREDITED, JOHNE'S LEVEL 1 & NEOSPORIN LEVEL 2**

26.01.2024

WELCOME

Welcome to our 2024 'Northern Lights' breeding sale, whether you are a returning customer or thinking about purchasing from us for the first time you are most welcome and we thank you for considering our genetics.

In 2023 we were delighted when our herd won the Scottish Herds Competition for the first time, amongst our individual prize winners was Fearn Severn who was placed 2nd in the yearling bull class and who is offered in this year's sale.

We don't tend to show much but do enjoy entering our regional herd competition when someone comes to the farm to compare what we have with other herds. There's usually a little family debate regarding which animals we enter beforehand and we certainly don't always get it right but its extremely satisfying when we do and we always learn from the judges who come to visit.

Fearn Statesman is another that catches the eye, he also happens to be out of the same cow as last year's top priced bull Fearn Ruairidh.

All of our bulls are the real deal, they have been semen tested and inspected and we have taken every opportunity to remove anything that hasn't been up to scratch since weaning.

We are delighted with the way this years crop of bulls have turned out and feel what we have on offer would compliment both commercial and pedigree herds. They have been grown naturally as usual, being brought inside just before the sale for viewing purposes.

Our heifers are free of the bull this year and had an average weight of 523kgs on the 5th of December, like the bulls they were outwintered as calves and offer an excellent opportunity to attain high quality breeding females. Our herd is Neospora level 2 and all cattle have been vaccinated for BVD and we are also Johne's Level 1.

If your looking for semen we have various outstanding herd sires available including, for the first time, Palmerston of Upsall who we purchased in 2022 for 25,000gns and Fearn No limits who's calves featured strongly in the Dunsyre dispersal, including one cow and calf unit which made 20,000gns.

Please get in touch to come and view the cattle, we would be delighted to hear from you and can arrange viewing throughout January.

Equally if you can't make it to view in person please give us a phone to discuss your requirements, we enjoy helping our customers select genetics which will suit their system and are more than happy to chat through requirements.

Best regards The Scott Family

SEMEN & SEMEN REFERENCE SIREs

SUTHERLAND LUING BULLS FOR SALE

SALE FORMAT

The sale will be conducted as a Helmsman-style auction, meaning that all lots are for sale simultaneously.

The sale will be hosted via our Yourbid platform, accessed via our website - www.fearnfarm.com. Once registered, online buyers will receive a buyer number via email which will automatically accompany each bid placed. All live bids will be visible at all times online.

Online bidding will commence on the **19th January 2024 at 10am** and run until the conclusion of the sale on the **26th January 2024 at 3pm once there has been a period of at least two minutes without a bid being received on any lot.**

If another bid is placed on any lot during the two-minute period, then time is extended, where bidding is open on all lots. Final time will be called clearly and discretion will be used to ensure all buyers are satisfied.

We would encourage all buyers to register 24 hours in advance of the conclusion of the sale and place practice bids on our demonstration lots ahead of the sale day.

Please join us on Friday 26th January on farm from 12pm to the conclusion of the sale. Hot food and drinks will be provided!

To get help with registering or any of the above, or if you do not have online access, please get in touch with any of the team here at Fearn Farm.

Fearn Farm
Phone: 07770 863506 | 01862 832552/832205
Email: admin@fearnfarm.com
www.fearnfarm.com

VIEWING

Prior to the sale, all lots will be filmed and photographed for you to view online (there is link to view online in this document). If you would like to physically view the stock prior to the sale, please contact John to arrange an appointment.

Please get in contact -

Email - john@fearnfam.com

John Scott Mobile - 07770 863506

James Scott Mobile - 07799 352558

TERMS & CONDITIONS

The sale will be conducted in pounds. Bidding increments will automatically set to the following unless overwritten by the purchasers via Yourbid:

- Breeding Males - £200
- Breeding Females - £100
- Semen - £5

Notice to buyers – all purchases to be settled before removal of stock from Fearn Farm if not previously arranged with John Scott. Any party successfully bidding on a lot will be deemed to be liable for that account. Bulls will be sold under NBA rules, with a 6 month breeding warranty given from the date on which animals leave Fearn.

COLLECTION & DELIVERY

Throughout this process we have been mindful of distribution of the cattle throughout and out of the UK if required. We have made contact with Armstrong Haulage and the team at A J Ewing, Annan, who have agreed to assist us with UK and export distribution.

If you are local to the Highland area we can deliver within reason. All stock can be left at Fearn, at the sellers risk, until 9th February. After which date animals can be kept for longer by separate agreement at which their will be a cost involved. Please discuss your requirements with John Scott.

HEALTH STATUS

All of our herds are Johnes Disease Level 1 and BVD Accredited and Neospora Risk Level 2. We vaccinate all animals for BVD and females for Lepto. Females have also received an all trace bolus.

CONTACT US

If you need to get in contact with us prior to the sale or on the day of the sale please get in touch with us via the following methods :

Email - john@fearnfam.com

Office Phone - 01862 832522 / 832205

John Scott Mobile - 07770 863506

James Scott Mobile - 07799 352558

THANK YOU

The Scott Family would like to take this opportunity to say thank you to our team for pulling the sale together, Ian and Jimmy for clipping the cattle, Anne MacPherson for the photography and videos and our vet, Lucy, for her continued guidance and support.

We would also like to thank our sponsors for their continued support, we enjoy working with you. To the Giddings family in New Zealand who created Yourbid, a platform that has been a game changer in the way we sell our livestock.

UNDERSTANDING THE BREEDPLAN

PERFORMANCE RECORDING INFORMATION

IN THIS CATALOGUE

Only Beef Shorthorn GROUP BREEDPLAN EBVs or INTERIM EBVs with Accuracy (Acc) can be validly compared between herds.

ESTIMATED BREEDING VALUES (EBVS)

The EBV is the best estimate of an animal's genetic merit for that trait.

ACCURACY

An accuracy value is presented with every EBV and gives an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or it's relatives. Accuracy below 75% should be considered low.

CALVING EASE

Calving Ease EBVs are based on calving difficulty scores, birth weights and gestation length information. More positive EBVs are favourable and indicate easier calving.

DIR: Direct calving ease indicates how this animal influences the birth of its progeny.

DTRS: Daughter's calving ease indicates how well the animal produces daughters that have easier calving.

BIRTH AND FERTILITY

GL: Gestation Length EBV (days) is based on AI records. Lower (negative) GL EBVs indicate shorter gestation lengths which generally relate to easier calving and increased growth after birth.

BWT: Birth Weight EBV (kg) is based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

SS: Scrotal Size EBV (cm) is an indicator of male fertility in regards to semen quality and quantity. Higher (positive) EBVs indicate higher fertility. There is also a small negative correlation with age of puberty in female progeny.

GROWTH

MILK: 200-Day Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV is indicative of their daughter's milking ability as it affects the 200-day weight of their calves.

200: 200-Day Growth EBV (kg) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400: 400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600: 600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

CARCASE

CWT: Carcase Weight EBV (kg) estimates the genetic difference in carcase weight at a standard age of 650 days.

EMA: Eye Muscle Area EBV (cm²) estimates genetic differences in eye muscle area of a 300kg dressed carcase. More positive EBVs indicate better muscling on animals.

FAT: Rib Fat EBV (mm) estimates the genetic differences in fat depth at the rib in a 300kg dressed carcase. More positive EBVs indicate more subcutaneous fat and earlier maturity.

RBV%: Retail Beef Yield Percent EBV (%) represents total (boned out) meat yield as a percentage of a 300kg dressed carcase. A more positive EBV indicates higher percentage yield for the 300kg carcase size..

IMF%: Intra-muscular Fat Percent EBV (%) is an estimate of the genetic difference in the percentage of intra-muscular fat at the 12/13th rib site in a 300kg carcase. Depending on market targets, larger more positive values are generally more favourable.

Terminal index

The Shorthorn Terminal index is aimed at a commercial herd using Shorthorn bulls over dairy cross cows to breed steers and heifers to turn off at 19 months of age. All progeny are destined for slaughter and no replacement females are selected from within the herd. There is some emphasis on calving ease while finishing steers at around 580 kg live weight (310 kg carcase weight) using a pasture based production system.

Use this index in a commercial herd to produce progeny for slaughter. The index has moderate emphasis on easier calving (ie getting a live calf with minimal human interference) while producing calves that will then grow quickly to market specifications at around 19 months of age. The index is focused on slaughter animals and does not account for maternal traits and is therefore not suited to breeding replacement females.

If you are using smaller framed cows or heifers in your herd, then you should also put extra emphasis on a higher Calving Ease Direct EBV when selecting a sire using this index.

Self Replacing index - The Shorthorn Self Replacing index is aimed at a Shorthorn herd selecting replacement females from within the herd while breeding steers and excess heifers to turn off at 19 months of age. There is emphasis on calving ease and maternal traits while also looking to finish steers for slaughter at around 580 kg live weight (310 kg carcase weight) using a pasture based production system supplemented with extra rations during the finishing phase.

This Self Replacing index is also suitable to using Shorthorn sires over mixed breed cows where replacement females are sourced from within the herd. There may be some hybrid vigour expressed in the progeny depending on the breed type of the cows used. Therefore you should consider placing extra emphasis on the Calving Ease EBVs (more positive) of the sire to allow for possible heavier birth weights of his calves due to hybrid vigour.

Use this index in both commercial and pedigree herds where you are balancing the requirements of selecting replacement females while also producing animals for slaughter.

Maternal Index - The Maternal Index is designed for a commercial Beef Shorthorn cross herd that is focused on breeding herd replacements and on weaning as many and as heavy calves as possible at 8 months of age. It estimates the genetic differences between animals in net profitability per cow mated, for an example Beef Shorthorn Euro cross commercial cow herd targeting the production of pasture grown calves. Steers and heifers are weaned and marketed at an average of 350kg live weight at 8 months of age for further finishing or as replacement heifers.

The Beef Shorthorn GROUP BREEDPLAN Estimated Breeding Values contained in this Sale Catalogue were compiled by the Agricultural Business Research Institute (ABRI) from data supplied by the breeders. Neither the Beef Shorthorn Cattle Society nor the ABRI oversee or audit the collection of this data.

November 2023 Beef Shorthorn - Percentile Bands for all 2021 born animals

Use this table as a guide to compare individual animals with the current genetic level of the breed

Comments: Shildaig is another heifers calve sired by Priddy and this time out of a granddaughter of Fearn Henrietta Monique who bred the £17,500 Fearn Rhuiridh last year. Shildaig is a well balanced, eye catching, easy moving light roan who we feel would be very well suited for heifers or cows. Top 5% Gestation Length and Birth Weight. Top 10% Calving Ease DIR, Carcass Weight and Retail Yield.

Avg. 2021 Calves	+0.3	+29	+1.9	-0.1	+0.7	-0.1	+29	+30	+23

Comments: One of the picks of this years group, a real easy fleshing thick set bull with the figures to back it up. Sired by Godfather who needs no introduction and a full brother to the £8,300 Fearn Peroni. Scotsman boasts the highest Maternal GBP for a bull his age in the country. Top 1% Eye Muscle Area and Maternal GBP. Top 5% Terminal Index, Self Replacing Index, 200 Day Weight, Milk, Carcase Weight and IMF.

Comments: Schoeman named after the Scotland and Edinburgh prop is a thick, deep red, easy fleshing bull with piles of character. The first son for sale from Highlee Minstrel and the last calf of F00 a Meonhill Highland captain daughter who has always bred well including Fearn Nevis who made £7,600 in our 2021 sale. Top 25% for Milk, Scrotal Size and IMF.

FEARN · FARM

**2022 BORN NON-REGISTERED
SHORTHORN BULL**

LOT 13

LOT 13 - FEARN SARACEN (NON-REGISTERED)

BORN: 05/04/2022

UK502113 602020

GS. MANDALONG SUPER ELEPHANT (P)

SIRE - FIREFOX OF UPSALL (P) (UK121060-400847) EX 93 593801329

GD. CLIPPER X699 OF UPSALL (P) (UK121060-300699) GP 83

GS. FEARN ELMER (P) (UK502113-201057)

DAM - UK502113 401640

GD. UK502113 201281

Comments: Saracen has been a standout calf since birth. Everytime we took anyone around cows and calves we were always asked "who's that?" for that reason we just couldn't cut him. Being a Firefox son he comes with easy calving and longevity in his blood and his mother being an Elmer daughter brings easy fleshing and grass conversion capacity.

Comments: Having not sold last year we felt Rhynie was too good to kill and was kept on and used on late calvers, which he has settled in calf at the first time of asking. Rhynie's mother H55 has bred consistently over the years with many bulls and heifers making the cut. His father who we used through AI has really impressed us with offspring all performing well in the herd. Top 5% Mature Cow Wt, top 10% 200,400,600 Day Weights, Carcase Weight and Terminal Index.

Comments: By Dakota of Upsall, Godfather was used briefly before we sold him as a 2 year old for 10,000gns in Stirling. When Coldrochie decided to sell we went to view him pre-sale and thought that buying him back was worth considering. He consistently produces cattle which thrive in both the commercial and show environments and his progeny have been well placed at multiple shows over the years.

Comments: Elmer was an outstanding Fearn Bundaleer son who has left us several excellent females many of whom have sons in this years sale. We continue to use him via AI and ET, its very hard to get cattle that flesh like he did, his steers averaged 360kgs DW at 18 months of age from grass alone.

Comments: Jimmy is an embryo from the highest priced cow at the Austin's sale in New Zealand combining Bonny 08064 and Broughton Park Diplomat from Australia. He's a big stretchy bull and is leaving long milky females, with fantastic udders many of which have classified EX. Now having returned home after a 2 year stint in Yorkshire we decided we'd be stupid not to collect some semen from him.

Comments: No limits made his way to the Dunsyre herd as a yearling at the same time Nimrod and Nightrider came North. When we saw him last year on our way home from judging the North of England Herd competition even with a hurt shoulder it was fair to say he impressed, as did the many calves Carey had on the ground by him. When we got the opportunity for him to come home it wasn't something we were going to pass up. Since then he has run with 40 cows in the summer and gained condition and when semen collection time came around he was first on the list.

Comments: After not selling in the sale last year Resolis kept getting better and better and by the time breeding season came around we felt he was too good not to use, he went from strength to strength and didn't lose a drop of condition whilst working. We had a lot of interest in him through the summer when people saw him with cows and for that reason decided to collect some semen and offer it up for sale.

Comments: Firefox of Upsall was bought in 2020 as cover for our existing bull team which was on the young side that season. This Mandalong Super Elephant son is now eleven years old, and like fine wine is getting better with age. With his first crop of heifers calving down last spring it's be fair to say we're delighted with them. They are functional, easy handled, correct, milky young cows with great bags who all classified well for heifers calved at 2 y/o.

Comments: Palmerston was purchased at Stirling in 2022 for 25,000gns the highest we have ever paid for a bull. We were drawn to Palmerston firstly on paper where of the 18 sets of data 14 are in the top 10% and 7 of those in the top 1%. Palmerston is a real rectangle of beef he's got depth right the way through and carries himself really well. Our first crop of calves from Palmerston have really impressed us and we're looking forward to seeing how they grow on and perform in the coming years.

Comments: Dunsyre Nimrod was brought from Carey Coombs in 2020 as a junior herd sire, he's a smart roan son of Sutherland Bundaberg with good calving figures. His females have been awesome so far, being kind mothers with plenty of milk and we're excited to see how they mature as they head into their prime.

Comments: Bought to cover heifers and successfully used for two seasons before damaging himself in action, he was an easy fleshed Belmore Fuel Injected V12 son a bull that has bred very well in the past, hence our desire to bring some genetics into the herd.
